Admin add new test page
Test Config
*Under the Hood
Client Javascript
Server Go Code
HTTP headers/requests
html template
browserAuditCategory(34, function() {
cspTest(405, 230, "default-src 'none'; report-uri
/csp/pass/230/emptyhtml?browseraudit=echocookie", false, {
timeout: 300 });
cspTest(406, 231, "default-src 'none'; report-uri
/redirect/"+$.base64.encode("/csp/fail/231/emptyhtml?browseraudit=
echocookie"), true, { timeout: 300 });
});
here there is a tricky discussion to be had about how much do we show of underlying functions like BrowserAudit Test or CSP test , where the duality is between test templates or categories and subcategories and the call stack of functions to call and the corresponding chai code. I believe there is a sweet spot of how much you show to devs. to make their life easier.
